

Burst Charge Whistle:

Name: **Whistle Mix 1**

Source: **unknown**

Chemical	Parts by weight
Potassium Perchlorate	70
Sodium Benzoate	30

Warning:

Whistle mix is sensitive to friction and should never be ball milled. However, mixture is safe to mix by screening.

Potassium benzoate may be substituted for the sodium benzoate, which is recommended for those working in a damp climate. Mixture must be well mixed to function properly as a break charge.
